

GROUNDBREAKING CELEBRATION

Canton South Middle School

September 14, 2020 – 5:30pm

The new Canton South Middle School will serve approximately 450 students in grades 6-8, and shares the same site as the existing high school to create a middle/high school campus.

The building's elongated North-South shape allows it to fit within the constraints of the site while keeping district operations intact. The floor plan reflects 21st Century Learning in which the layout of spaces not only supports flexibility of use, but various learning experiences that will help students form the skills needed in the 21st century workforce. The exterior design borrows overall theme, colors, and materials from the existing high school to help create a campus identity, yet still looks like its own building and design.

Funding for the project comes from public utility taxes that the district has been able to put aside over the past several years, along with a partnership with the Ohio Schools Facilities Commission.
